the brief

Pinebridge

Pinebridge Investments - London HQ

Project Value - £140,000

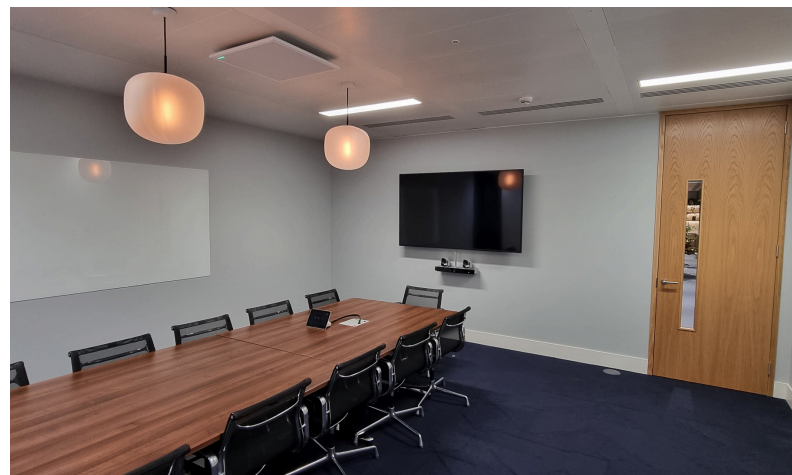

The PineBridge Investments project involved the complete redesign and upgrade of the organisation's audiovisual and meeting room infrastructure across multiple workspace environments, including 6-person, 8-person, and 12-person Microsoft Teams Rooms, internal collaboration spaces, open areas, the reception zone, and social areas.

The objective was to replace legacy systems with a unified, modern, and fully standardised AV ecosystem that supports high-quality hybrid collaboration.

 Solution certified for Microsoft Teams

the solution

■ Townhall Spotlight

The PineBridge Investments AV upgrade project successfully delivered a fully modernised, standardised, and enterprise-grade Microsoft Teams Rooms environment across multiple meeting spaces and shared areas within the London office. The project encompassed a wide range of AV deployments, including 6-, 8-, and 12-person Teams Rooms, multiple ceiling-mounted displays, social areas, reception spaces, and an internal screen network.

The PineBridge Investments AV upgrade project successfully delivered a fully modernised, standardised, and future-proof collaboration environment across all meeting and shared spaces. By integrating Microsoft Teams Rooms systems, premium audio solutions, and high-quality displays, SPOR Group transformed the user experience into one that is intuitive, reliable, and consistent throughout the office. The combination of advanced technologies—such as Shure MXA910 microphones, Crestron UC platforms, and Logitech Rally cameras—has significantly improved meeting equity and hybrid communication.
