- Cisco Webex Room Systems
- Samsung Commercial 4K Displays
- Crestron Room Booking Panels
- Biamp Ceiling Microphone & DSP Solutions
- Extron AV Switching & Signal Distribution

the tech.

Insurance Company

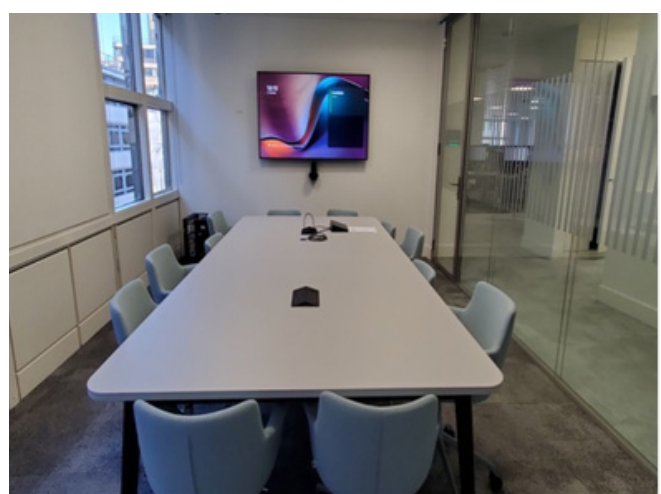

Insurance Company - London

The objective was to design and implement a consistent, reliable, and easy-to-use collaboration environment to support hybrid working, internal meetings, and client presentations across multiple meeting spaces.

The meeting room AV fit-out for the 2nd floor of the this office was successfully delivered, creating a consistent and reliable collaboration environment across all spaces. The deployment of standardised Cisco Webex Room Systems, integrated displays, and professional audio solutions has significantly improved the quality and ease of hybrid meetings.

The new systems provide a simple and intuitive user experience, enabling staff to start meetings quickly, share content effortlessly, and collaborate effectively with remote participants. The addition of room booking panels and IPTV distribution has further enhanced usability and room management

the brief.

Project Spotlight

Delivered a full meeting room AV fit-out for the 2nd floor of this office.

- Implemented standardised Cisco Webex Room Systems across six medium and two large meeting rooms.

- Installed Samsung commercial 4K displays to enhance presentation quality and video conferencing clarity.

- Integrated Biamp ceiling microphone and DSP solutions for high-quality audio performance.

- Deployed Crestron room booking panels to streamline scheduling and improve room utilisation.

- Implemented IPTV and cable TV distribution in selected areas.

The AV fit-out project successfully transformed the meeting room environments this clients office, delivering reliable and intuitive collaboration spaces that support hybrid working and day-to-day communication. By standardising technology and integrating enterprise-grade conferencing systems, the organisation now benefits from improved meeting reliability, enhanced user experience, and scalable AV infrastructure ready for future growth.
