CASE STUDY

Recruitment Agency - London HQ

Project Size - 27,000 sq ft

SPOR Group was appointed to design, supply, install and commission a fully integrated Audio-Visual solution for the 6th Floor workplace fit out at The Strand, London.

The objective was to deliver a high-performance collaboration environment that aligned with modern workplace standards while integrating seamlessly with the wider construction programme and IT infrastructure.

the brief

the tech

- PTZ Cameras
- SHURE MXA910 Mics
- SHURE DSP Processors
- Touch Control

Solution certified for Microsoft Teams

the solution

Townhall Spotlight

·Delivery of a high-spec Audio-Visual solution within a premium corporate fit-out on The Strand.

·AV programme aligned with the main contractor's construction schedule, ensuring zero impact on overall completion milestones.

·Full rack fabrication and testing completed off-site, significantly reducing on-site commissioning time and risk.

·Close collaboration with the client's IT team to ensure secure, scalable AV-over-IP infrastructure.

·High-performance video conferencing systems deployed to support seamless hybrid meetings and executive-level presentations.

the result

The successful delivery of the 6th Floor AV installation at The Strand demonstrates SPOR Group's ability to manage and execute high-specification workplace technology projects within a live construction environment. Through structured design workshops, proactive risk management and close collaboration with both the main contractor and the client's IT team, the project was delivered in line with programme requirements and to a high technical standard. Off-site rack build and staged commissioning significantly reduced onsite risk and ensured a smooth installation and acceptance process. The result is a reliable, intuitive and future-ready collaboration environment that supports hybrid working, enhances meeting experiences and aligns with the client's long-term workplace strategy.
